VERSION RELEASE

v2026.4

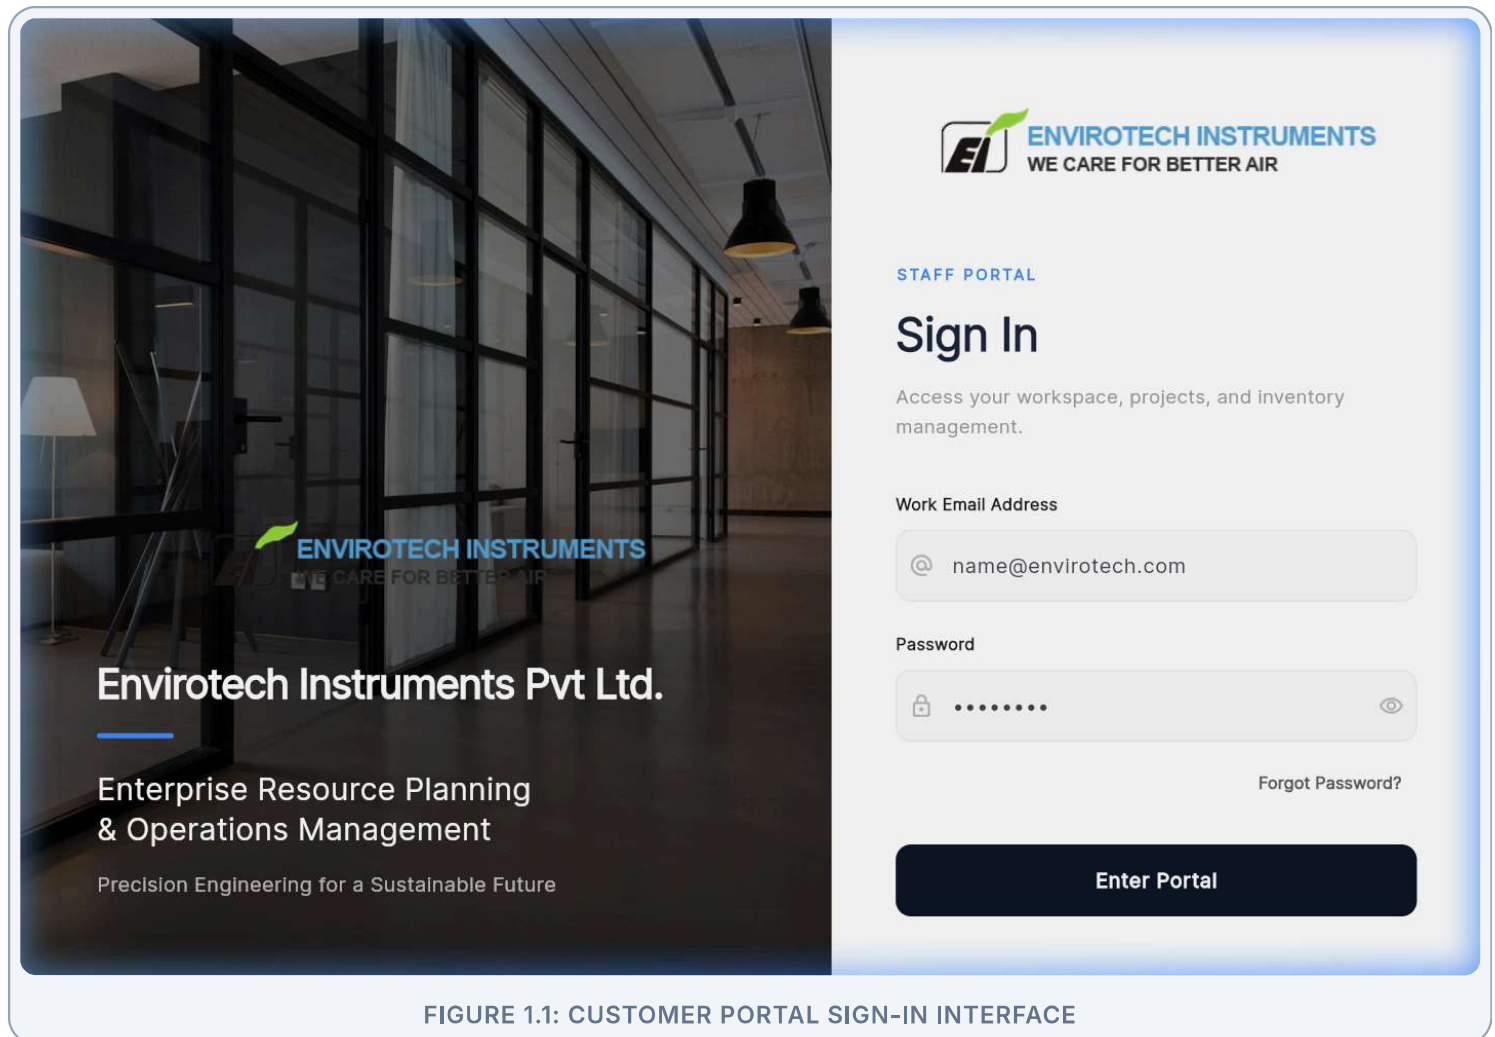

OVERVIEW

Envirotech Customer Portal

Welcome to the Envirotech Customer Portal! This is your personalized self-service dashboard to manage all your Envirotech air and water instrumentation. Through this portal, you can view technical catalogs, log new service or calibration tickets, receive notifications when your instruments require attention, and communicate directly with active engineering staff.

Direct Portal Access

To log into the Customer Portal, navigate to the **/clientlogin** URL on the main web application or toggle the "Client Access" link directly on the sign-in screen.

SECTION 01

Registering & Creating Your Account

Before using the portal, you must establish secure access linked to your registered corporate records.

1

Enter Portal Credentials

Go to the Sign-In screen. If your business contact number or email is already registered in our system:

- Enter your phone number or email and click **Continue**.
- If you have already established a password, enter it to log in instantly.

2

Registering a New Account

If you are signing in for the first time:

- Click **Create Account** at the bottom of the sign-in form.
- Fill in your Full Name, Corporate Email, Phone Number, and Company Name.
- Submit the form to initiate validation.

3

OTP Token Verification

To verify your identity, the system sends an SMS OTP confirmation code:

- Enter the 6-Digit Verification Code received on your device.
- Click **Verify Identity** to proceed.

4**Establish Secure Password**

Once identity verification is successful, set your personalized secure credentials:

- Input your new strong password.
- Re-enter to confirm. Your account is now fully active!

SECTION 02

Product Catalog & Service Requests

The core of the portal is managing your equipment requirements and arranging for periodic technical calibration or sales inquiries.

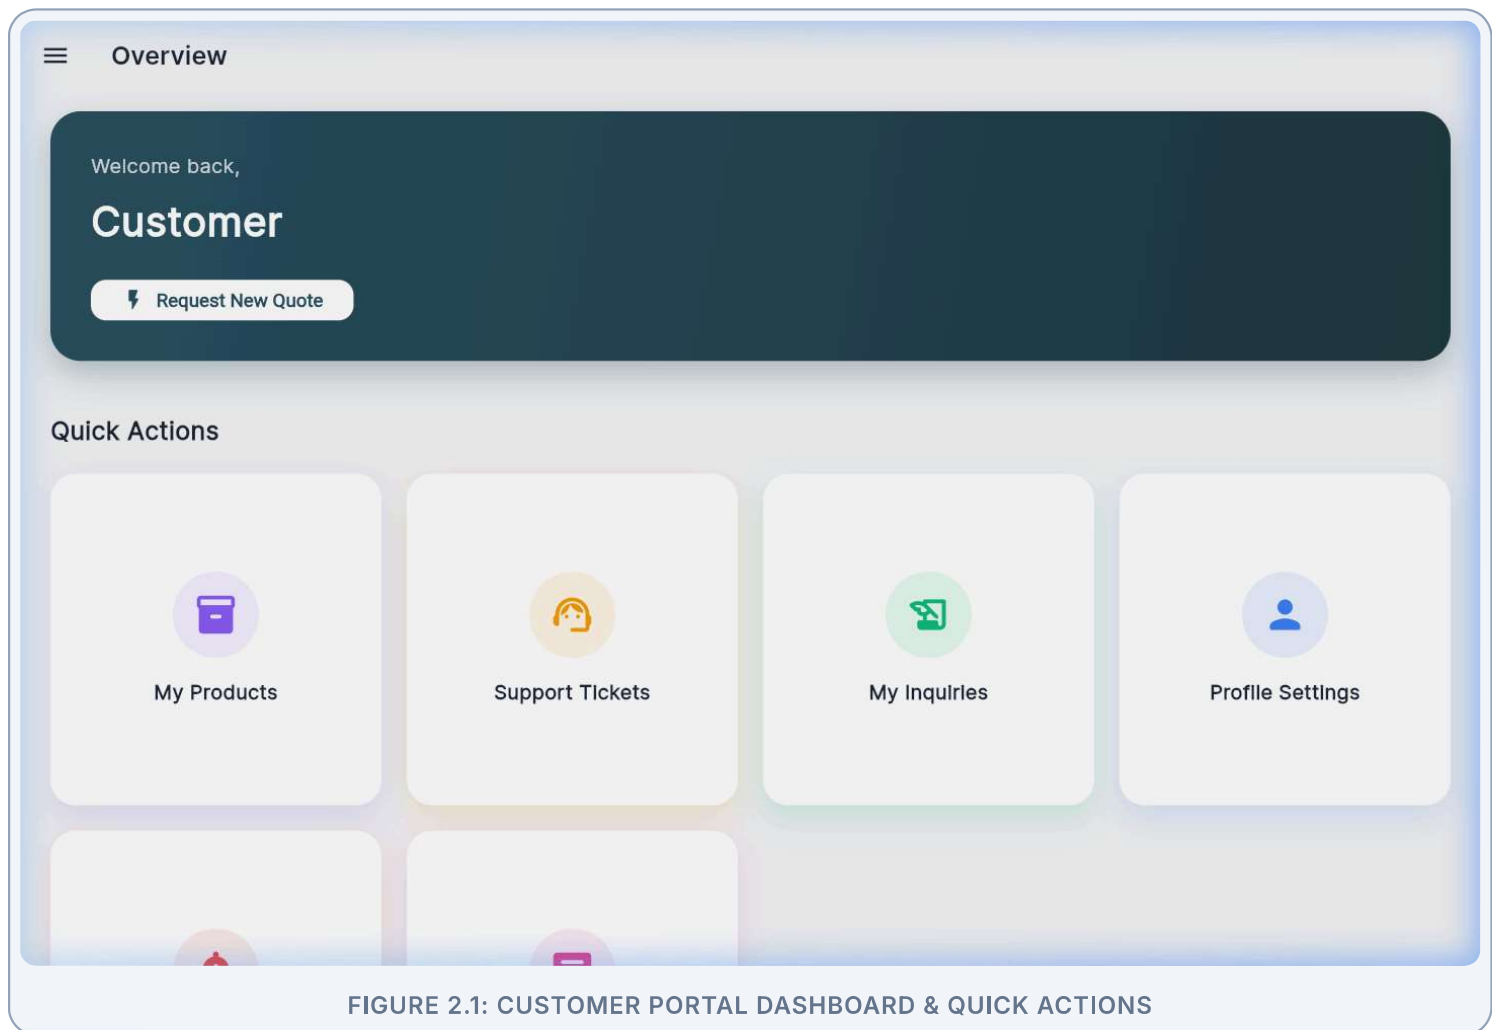

FIGURE 2.1: CUSTOMER PORTAL DASHBOARD & QUICK ACTIONS

1

Browse the Technical Catalog

Review standard corporate catalogs and view technical sheets:

- Click **Catalog** on the portal dashboard sidebar.
- Click on any product to view full chemical/physical specifications, operation ranges, compliance certificates, and image blueprints.

Launch Calibration or Sales Inquiries

Need support or looking to buy? File structured requests directly:

- Navigate to the **Inquiries** tab and click "New Inquiry".
- Select service type: **Sales Order** (to buy new units) or **Calibration/AMC Service** (for scheduled maintenance/re-calibration).
- Describe instrument issues, select product category, and upload attachments.

Proactive Reminders Section

Under the **Action Required** dashboard tab, you will receive real-time alerts for AMC contracts expiring in under 30 days and calibration timelines due, complete with one-click Renewal Requests!

SECTION 03

My Products (Corporate Asset Registry)

Track all Envirotech instruments assigned to your business location in real-time.

1

Check Asset Status

Open the **My Products** card on your dashboard to see your company's registry:

- View unique ****Serial Numbers**** registered for each air/water instrumentation module.
- Check warranty expiry status tags (Active, Expired).

2

Calibration Lifecycles

Every industrial instrument requires periodic validation:

- Review the ****Next Calibration Due**** column on your asset chart.
- A red tag indicates that an instrument is past-due and requires immediate recalibration.

SECTION 04

Support Tickets Action Center

Log maintenance, request technical fixes, or manage instrument breakdowns systematically.

1

Submit a New Support Ticket

If an instrument registers incorrect values or suffers a mechanical failure:

- Go to ****Support Tickets**** and click ****Create Ticket****.
- Select the affected instrument serial number.
- Select priority level (High, Medium, Low) and describe the error readings.

2

Track Ticket Progress

Envirotech engineers update ticket tags as work progresses:

- **Open:** Request received; technician is being assigned.
- **In Progress:** Engineer is actively working or calibrating.
- **Resolved:** Work complete; calibration certificate issued. If you are satisfied, click ****Close Ticket****.

SECTION 05

Interactive Customer Support Chat

The portal includes an integrated live support chat directly connected to Envirotech engineering staff.

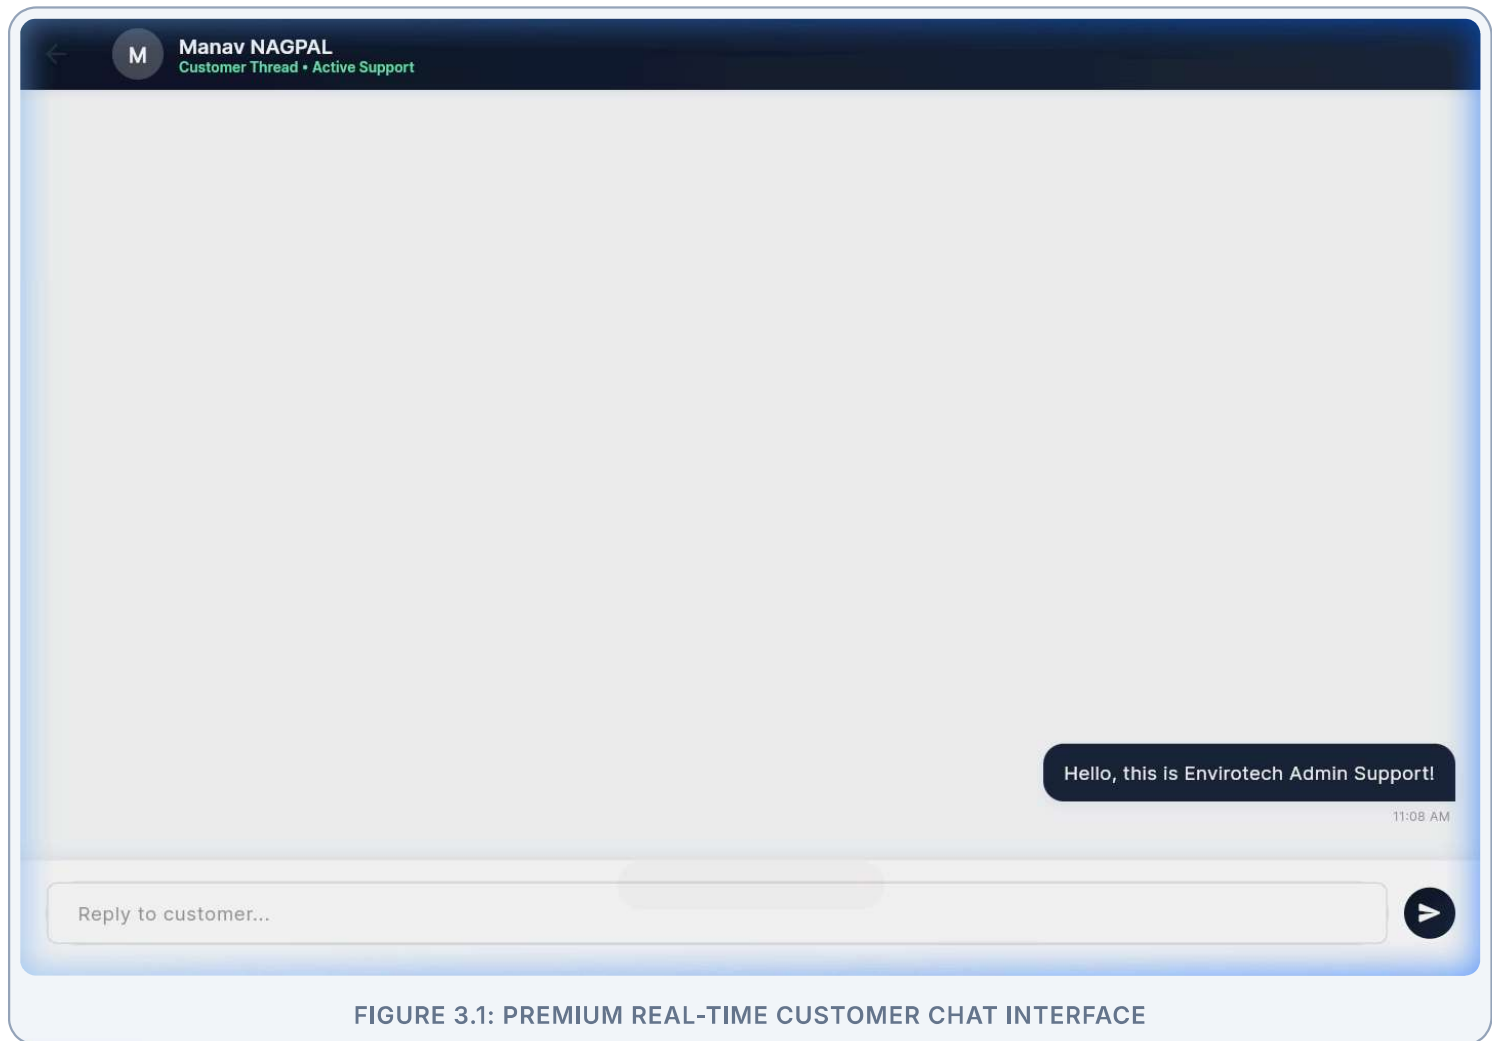

FIGURE 3.1: PREMIUM REAL-TIME CUSTOMER CHAT INTERFACE

1

Initiate a Chat Session

Access the active chat screen from the dashboard:

- Open the bottom-right floating chat bubble or click the **Live Support** menu.
- An active secure chat thread launches immediately under your profile name.

2

Message Engineering Staff

Ask technical questions, request invoice details, or query dispatch timelines:

- Type your message in the chat input and click the **Send** button.
- Technicians will respond instantly with live notifications. The chat persists securely so your history is always available!

SECTION 06

Profile & Corporate Settings

Manage contact logs and update destination locations to ensure seamless dispatch processes.

1

Maintain Shipping Addresses

Keep your corporate locations updated:

- Navigate to ****Profile Settings****.
- Add multiple shipping/billing addresses for different offices or processing plants.

2

Alert Preferences

Configure how you receive expiry notices:

- Enable SMS and Email toggles to receive automated alerts 30 days prior to any AMC expirations.
